Legislative Update: Monday, April 18th, 2011

Last Thursday, April 14th, President Obama signed into law a repeal of the 1099 mandate that was part of the PCCA health reform legislation passed last year. Beginning in 2012 every small business would have had a tremendous increase in the number of 1099s they would have been required to file with the IRS. The government believed that they would get a significant increase in revenue from the additional 1009s but the tremendous increase in paperwork for small business would not have justified the small increase in revenue. CA has supported the repeal effort through letters and calls to Congress and is pleased with the repeal that will lessen the administrative burden on CA members and other small businesses.

Sincerely,

Wayne K. Nelson
CA President
